¹ Data based on corn for grain.

Stocks of corn on farms on January 1, 1938, are estimated at 1,667,989,000 bushels compared with 806,935,000 bushels on January 1, 1937, and the 5-year (1928-32) average of 1,384,343,000 bushels. The relatively large stocks of corn reflect the smaller number of livestock being fed.

Farm stocks of wheat on January 1, 1938, were estimated at 208,745,000 bushels, well above the 128,314,000 bushels on the

same date last year but considerably below the 5-year average of 249,495,000 bushels.

Farm stocks of oats on January 1, 1938, amounted to 688,937,000 bushels, about the same as the 5-year average of 686,164,000 bushels, but considerably above the stocks of 482,158,000 bushels on January 1, 1937.

¹ Condition reported on Jan. 1 refers to crop from bloom of previous calendar year.

² Relates to crop from bloom of year shown, picking beginning Nov. 1 in California and Sept. 1 in other States.

³ Net content of boxes varies. In California and Arizona the approximate average for oranges is 70 pounds net and grapefruit 60 pounds; in Florida and other States oranges 90 pounds and grapefruit 80 pounds; California lemons, about 76 pounds net.

Pounds of Milk Produced per Milk Cow in Herds Kept by Crop Correspondents on Jan. 1, 1938, With Comparisons, Averages for Grand Divisions, and Details for Some of the Included States

[State averages calculated by dividing the reported total daily milk production on the 1st of each January by the number of milk cows in milk or dry on the farms reporting. The United States average is based on about 20,000 herds. To reduce to quarts divide by 2.15]

¹ The prices at country points apply to milk delivered direct by farmers in their own cans to local milk shipping stations and nearby city milk plants. "Basic" prices are used for cities where a surplus plan or pooling plan is in effect, and where net prices are not yet determined. The price per 100 pounds may be reduced to cents per quart by dividing by 46.53.

¹ Preliminary.

Western ranges are in fair to very good condition and carry an average supply of feed. Range feed conditions are poor to fair in the dry Great Plains sections, but good with above-average feed in other sections. Livestock are generally in good condition following favorable conditions during December, according to the monthly livestock and range report.
